SUMMARY

Backend software developer completing a Master of Applied Computer Science at Concordia (GPA 4.03/4.30, expected Dec 2026, coursework in Distributed System Design), with 3+ years of production backend and distributed-systems engineering in C++, C#/.NET, and AL. Led a zero-code migration of a high-availability MSSQL cluster to a multi-node PostgreSQL/Postgres cluster and now designs secured REST APIs for cross-team integrations. Builds AI tooling, including Claude Code, into daily development and code-review workflows.

TECHNICAL SKILLS

Languages: Python, C++, SQL, C#/.NET, TypeScript, AL

Databases & Distributed Systems: multi-node PostgreSQL/Postgres (Babelfish migration), SQL Server HA, distributed systems engineering, REST API design

Backend & Delivery: End-to-end SDLC ownership, CI/CD (Jenkins, MSTest), code review, cross-functional collaboration across 10+ teams

EXPERIENCE

Vffice

Montreal / Brossard, QC

Back End Developer

Sep 2026 - Present

- **Backend & APIs:** Designed a secured REST API and custom reporting documents on Microsoft Dynamics 365 Business Central; extended AL modules for order sync, workflow validation, and financial logic across production deployments.
- **Delivery & code review:** Delivered 23 pull requests while multitasking across 3 concurrent repositories, owning code review, testing, and release management end to end; piloted a knowledge-graph documentation workflow.

KLA Corporation

Chennai, India

Software Engineer

Jul 2021 - Nov 2024

- **Database & distributed systems:** Led a 3-person team on a zero-code migration from an MSSQL high-availability cluster to a multi-node PostgreSQL cluster (Babelfish, 1,200+ queries translated), cutting product cost 25% and driving roughly \$2M in new annual revenue.
- **Diagnosing system issues:** Managed SQL Server HA clusters and diagnosed production bottlenecks, improving query performance and reliability 30%; built an automated CI/CD pipeline (Jenkins, MSTest) that eliminated 95% of production bugs.
- **Cross-team collaboration:** Resolved critical escalations and deployed production releases on-site across 10+ teams in Korea, Japan, and Singapore; mentored 4 engineers and ran a weekly technical-talk series for roughly 80 staff.

Concordia University

Montreal, QC

Teaching Assistant

Jan 2026 - Apr 2026

- **Algorithms instruction:** Taught Data Structures and Algorithms (COMP 352) and Programming and Problem Solving (COMP 6481), converting complex technical problems into clear guidance for a wide range of students.

EDUCATION

Concordia University

Montreal, QC

Master of Applied Computer Science (Co-op); GPA 4.03/4.30

Jan 2025 - Dec 2026 (expected)

PSG College of Technology

Coimbatore, India

M.Sc. (Integrated), Software Systems; CGPA 8.55/10, First Class

2016 - 2021

PROJECTS

- **Agent Notes (C++, whisper.cpp, llama.cpp, SQLite):** Multi-threaded C++ audio-intelligence pipeline (Whisper + Qwen 2.5): 92% transcription accuracy across 8 languages, 16x real-time, sub-2s audio-to-summary latency.
- **Agent Goal (React Native, TypeScript, Supabase Auth + RLS):** AI goal-tracking app with secure Supabase sync and Row-Level Security, sub-100ms cross-device synchronization for 1,000+ user goals across iOS and Android; built with two collaborators.
